DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-36 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-36 of copending Application No. 09/796,641. This is a provisional statutory-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-36 of the Application are identical to claims 1-36 of the copending application. The claims of both applications disclose a stage positioning system for an electron beam or EUV light lithography system comprising: a stationary frame configured to support an article to be processed; a slide movable relative to the stationary frame, a support platform, and a first and second linear motor, wherein elements of the stage positioning system have the magnetic permeability remain essentially stationary during processing of the article.
